Description: Exciting new class. The ability for anyone to now publish their own book will be explored in this hands-on class. We will be using Booksmart Software, a free download from www.blurb.com. Steve will cover all aspects from choosing a format, importing pictures and text, design considerations and much more. Bring your laptop computer, loaded with Booksmart (or use ours for \$10 extra). If you want, we will help you install the free Booksmart program (Mac or PC). If you have Photoshop or Photoshop Elements, we can help you with any basic editing your photos may need. Or, if you need an image editor, we will install the free Fast Stone program (PC only; Mac users can use iPhoto). Bring images you want to use in your book. Bring more images than you think you'll need so you have some freedom of choice. Images should be full size JPEG. This will be a fun class and by the end of the day, you should be nearly ready to upload your masterpiece for printing! Lots of personal attention.
